

NEMESIS SUPER-KIT

BUILD YOUR OWN SENSATIONAL SUPERCAR
WITH MID-MOUNTED JAGUAR V12,
CHEVY V8 OR ROVER V8 POWER

'Controlling this big car is easy.
The power is endless. As the revs pile on, the
sound melts into one glorious roar that is utterly
enthraling and totally addictive. I love it.'

Ian Stent, *Which Kit?*

Python Back With Real

99 examples of this beautiful classic sports car were made during the early 1990s. Now it's back in production, the Python once again means business – serious business!

The only difference is that modern technology has been applied to construction of the body and chassis – both are now lighter and stronger. Performance is higher, handling is better, assembly is easier. This is a classic that's moved with the times.

Bite!

- Superb tubular chassis with fully triangulated backbone.
- Craftsman-made GRP bodywork using polyurethane foam sandwich techniques to increase strength and rigidity whilst reducing weight.
- Uses BMW 5-series donor parts throughout.
- BMW engine options range from 1.8-litre and 2-litre 4-cylinders to 2.8-litre and 3.5-litre straight sixes. The BMW V8 fits perfectly too.
- Also available with Jaguar suspension and Rover V8 or Chevy/Ford small-block V8 power.
- Full chassis £1495 inc.
- Complete body £1750 inc.
